

# Security Grille

Rolling Grille for Visibility, Security, and Air-Flow

## Great for Retail, Schools, and Hospitals

For a stylish way to seal an area, the security grille is a popular solution. With its aluminum tracks and quiet operation, rolling security grilles blend in easily. They are great for office and institutional environments, and they present a strong barrier to entry. You can add an emergency egress system, as well.

There are many options to choose from such as color, curtain pattern, and a variety of safety and control systems. Roll up security grilles are suitable for interior and exterior applications. They can be incorporated as the entire security door, or can be used as part of any coiling curtain where visibility or ventilation is required.

>> Optional: Emergency Egress System

>> Smooth and Quiet Operation

>> Various Patterns Available

>> Maximum Visibility
