## Please Note:

- Hex and Pantone colors provided are an approximation. Please do not rely on them for color-critical applications.
- Colors displayed on your monitor do not provide an exact match. All monitors display colors differently according to their calibration. The same is true for cell phone screens.
- Photocopies, laser, and inkjet printers do not provide an exact color match, as they use a different color gamut.
- Printed materials do not provide an exact match, as they do not use the same pigments as paints.

If your application requires a more accurate color match, please reference the RAL color deck or request a sample.
